STATISTICS

UNIT 1

On the last day of the year, the total number of COVID-19 cases reported in India was 1,12,12,121. The total number of deaths reported was 2,12,121. The total number of recoveries reported was 1,10,00,000.

COVID EDUCATION: CURE

The COVID-19 pandemic has caused a global health crisis. It has led to the death of millions of people and the economic collapse of many countries. The World Health Organization (WHO) has declared it a global health emergency. The Indian government has taken several measures to control the spread of the virus, including lockdowns and strict quarantine measures. The statistics show that the number of cases in India has increased significantly over the past few months.
